

nützliche Shell Skripte

31c3

Download aller Videos des 31c3

[download_31c3_video_streams.sh](#)

```
#!/bin/bash
#
MIRRORURL="http://cdn.media.ccc.de/congress/2014/h264-hd/"
URLFILE="videos.url"
INDEXFILE="index.html"

echo -n "clean up old files ..."
if [ -e $INDEXFILE ]; then
    rm $INDEXFILE
fi
if [ -e $URLFILE ]; then
    rm $URLFILE
fi
echo "done"
echo ""
echo -n "Downloading new \"index.html\" ..."
wget -q $MIRRORURL
echo "done"
echo ""
echo -n "extracting video urls..."
grep -i video.png index.html | cut -d "\"" -f8 >> $URLFILE
echo "done"
echo ""
echo "searching for new videos and completing partial downloaded
videos..."
while read line
do
    wget -c -N $MIRRORURL/$line
done <$URLFILE
echo "done!"
```

Nicht vergessen `download_31c3_video_streams.sh` mit `chmod +x`

`download_31c3_video_streams.sh` auch ausführbar zu machen

Die folgenden Zeilen erleichtern das Herunterladen und starten des Skriptes:

```
wget -O download_31c3_video_streams.sh
"http://www.von-thuelen.de/doku.php/projekte?do=export_code&codeblock=0"
chmod +x download_31c3_video_streams.sh
```

```
./download_31c3_video_streams.sh
```
