Debian 8.x Jessie Installation

Installation wie in [1] beschrieben durchführen.

```
wget http://ftp.uk.debian.org/debian/dists/jessie/main/installer-armhf/current/images/netboot/SD-card-images/firmware.Cubietruck.img.gz
wget http://ftp.uk.debian.org/debian/dists/jessie/main/installer-armhf/current/images/netboot/SD-card-images/partition.img.gz
zcat firmware.Cubietruck.img.gz partition.img.gz > /dev/sde
```

- Serielles Kabel (FTDI-Kabel) anschließen um die folgenden Schritte auf der Konsole beobachten zu können
- sudo minicom -b 115200 -o -D /dev/ttyUSB0
- Cubietruck mit der neu erstellten SD-Karte booten
- Installation nach [1] fortführen
- Reboot

Konfiguration des Grundsystems

```
#login als root via serieller Konsole
apt-get update
apt-get upgrade
apt-get install mc apt-transport-https
dpkg-reconfigure locales
[*] de_DE.UTF-8
[*] en_GB.UTF-8
```

Netzwerkkonfiguration

```
nano /etc/systemd/resolved.conf
[Resolve]
DNS=192.168.100.1
#
ln -sf /run/systemd/resolve/resolv.conf /etc/resolv.conf
#
# falls ''systemd-resolved'' schon läuft:
systemctl restart systemd-resolved.service
#
# sonst:
systemctl enable systemd-resolved.service
systemctl start systemd-resolved.service
#
# nach [3]
nano /etc/systemd/network/eth0.network
#
[Match]
Name=eth0
[Network]
Address=192.168.100.3/24
Gateway=192.168.100.1
DNS=192.168.100.1
#
# LAN Schnittstelle abschalten:
ifdown eth0
#
cp /etc/network/{interfaces,interfaces_bak}
cat /dev/null > /etc/network/interfaces
update-rc.d networking remove
systemctl enable systemd-networkd.service
systemctl start systemd-networkd.service
#
# Login für den Benutzer ''root'' via SSH ermöglichen:
nano /etc/ssh/sshd_config
...
PermitRootLogin without-password -> PermitRootLogin yes
...
#
```

Sundtek DVB-C Tuner

Installation

```
ssh -l root <VDR-IP>
cd /root
wget http://www.sundtek.de/media/sundtek_netinst.sh
chmod +x sundtek_netinst.sh
```

```
./sundtek_netinst.sh
/opt/bin/mediaclient --dtvtransfermode=bulk -d /dev/dvb/adapter0/frontend0
# Reconnect Tuner #1
/opt/bin/mediaclient --dtvtransfermode=bulk -d /dev/dvb/adapter1/frontend0
# Reconnect Tuner #2
#
# VDR erneut starten wenn DVB-Tuner Treiber geladen sind:
echo "device_attach=service vdr restart" >> /etc/sundtek.conf
```

VDR

Auf keinen Fall die automatisch generierte Kanalkonfiguration (channels.conf für vdr) aus dem Kabel Deutschland Forum verwenden - die Parameter für die HD Sender der Öffentlich-Rechtlichen sind fehlerhaft und bringen den VDR regelmäßig zum Absturz (data stream broken → emergency exit).

```
echo "deb http://e-tobi.net/vdr-experimental jessie base vdr-multipatch" >>
/etc/apt/sources.list
gpg --keyserver keyring.debian.org --recv-keys 041390BC
gpg --armor --export 041390BC | apt-key add -
apt-get update
apt-get install vdr vdr-plugin-streamdev-server vdr-plugin-vnsiserver
vdradmin-am vdr-plugin-epgsearch dvb-apps
#
# VDR und VDRadmin-am Dienst via systemctl starten:
systemctl start vdr && systemctl start vdradmin-am
#
# VDR und VDRadmin-am Dienst via systemctl stoppen:
systemctl stop vdr && systemctl stop vdradmin-am
#
```

Sendersuche

```
sudo su
apt-get install w-scan
w_scan -fc -c DE >> channels.conf
```

Konfiguration

```
nano /etc/default/vdradmin-am
... ENABLED="1"
#
nano /etc/vdr/setup.conf
# automatische Kanalsuche abschalten:
UpdateChannels = 0
#
nano /etc/vdradmin-am/vdradmin.conf
LANG =
```

```
LANGUAGE = Deutsch
#
nano /etc/vdr/conf.d/00-vdr.conf
#--lirc
#--vfat
#
nano /etc/default/vdr
#VDR_CHARSET_OVERRIDE=ISO-8859-9
#
```

vor und nach Aufnahmen ...

/etc/vdr/recording-hooks/R90.custom

```
case $1 in
    before)
        # do here whatever you would like to do right BEFORE
        # the recording $2 STARTS
        echo 1 > /sys/class/leds/blue\:ph21\:led1/brightness
        ;;

    started)
        # do here whatever you would like to do right AFTER
        # the recording $2 STARTED
        ;;

    after)
        # do here whatever you would like to do right AFTER
        # the recording $2 ENDED
        echo 0 > /sys/class/leds/blue\:ph21\:led1/brightness
        chmod -R g+w $2/..
        ;;

    edited)
        # do here whatever you would like to do right AFTER
        # the recording $2 has been EDITED
        # $3 is the original recording
        ;;

    deleted)
        # do here whatever you would like to do right AFTER
        # the recording $2 has been DELETED
        ;;

esac
```

Radiorecorder Web GUI

```

sudo su
apt-get install lighttpd streamripper at
systemctl status lighttpd
usermod -G vdr -a www-data
#chown -R www-data:www-data /var/www/html
#chmod -R 775 /var/www/html
# zuerst lighttpd installieren da sonst auf Grund von Abhängigkeiten evtl.
der apache2 Webserver installiert wird!
apt-get install php5-common php5-cgi php5
lighty-enable-mod fastcgi
lighty-enable-mod fastcgi-php
systemctl restart lighttpd
echo "<?php phpinfo(); ?>" >> /var/www/html/phpinfo.php
# Im Browser öffnen: http://<RASPERRYPI-IP>/phpinfo.php
# www-data aus /etc/at.deny entfernen
